# Alexandre Paresy

alexandreparesy.pro@gmail.com
aparesy.github.io
github.com/aparesy

Third-year computer science and mathematics student at École Polytechnique (X2024), with a strong interest in problem solving, algorithms, and AI. Ranked 14th/435 in my cohort. Participated in the international programming competition ICPC SWERC 2025 and ranked 24th in Southwest Europe.

## Education

*2024 – 2028* **École Polytechnique, Polytechnician Program** *Palaiseau, France*

Master's degree in France's flagship university in science and engineering

- Multidisciplinary curriculum: Computer Science (competitive programming in C++, data analysis in Python, formal verification), pure and applied Mathematics (differential calculus, martingales, game theory), Physics, and Humanities.
- President of the competitive programming association, organized internal contests with original problems. Member of the network infrastructure association.
- Current GPA: 4.1/4.0 (14th/435)

*2022 – 2024* **Preparatory class for Grandes Écoles** *Lycée Louis-le-Grand, Paris*

2-year intensive preparation for the Grandes Écoles competitive exams.

- Chose the Mathematics, Physics and Informatics track, entering at 15 having skipped two grades. Admitted to Polytechnique through the X-ENS exam, ranking in the top 15 in France. GPA: 4.0/4.0.

## Experience

*Jan. 2026 – Present* **Computer Science Oral Examiner** *Paris, France*

Lycée Louis-le-Grand

- Giving hour-long computer science oral examinations to first-year preparatory class (MP2I) students, two hours a week, with personalized feedback to groups of 3 students on topics including data structures and C and OCaml programming. Wrote over 30 original exercises, with an extract here: booklet link.

*June 2026 – Sept. 2026* **Software Engineer Intern** *Hanoi, Vietnam*

Linagora

- Developed client-side search for Twake Chat, the Matrix-based Flutter/Dart messaging app of Linagora, the largest French open source software publisher: rewired the app's search bars into a unified flow and implemented centralized diacritic-insensitive matching, with several pull requests merged upstream. Also proposed and prototyped improvements to the search architecture.

## Publications

- Lbath, M., **Parésy, A.**, Kaddouri, A., Zighem, A., & Vie, J. J. (2026). Live Knowledge Tracing: Real-Time Adaptation using Tabular Foundation Models. arXiv preprint arXiv:2602.06542. Accepted at AIED 2026 (CORE rating A); presented at the onsite poster session. Work conducted as part of a year-long project on knowledge tracing and AI in education, under the guidance of Jill-Jênn Vie (Inria).

## Interests and Skills

- **Competitive programming:** Represented Polytechnique at ICPC SWERC 2025, the Southwest Europe regionals of the world's largest programming competition, ranking 24th with my team. Won the Stockly coding competition (Oct. 2025). Reached round 3 of Meta Hacker Cup 2025 (top 1%). Prologin 2025 and 2026 finalist (top 100 in France). Participated in the 2026 Europe ICPC Training Camp (25 teams invited in Europe).
- **Math olympiads:** Ranked 6/1704 in the 2022 French Mathematical Kangaroo and 10th in my region at the 2021 Olympiades de première, France's largest mathematics olympiad.
- **Sports:** Participating with the Polytechnique badminton team in the university tournament.
- **Languages:** French (fluent), English and Chinese (proficient), German (basic).
- **Programming languages**: C, C++, Dart, GLSL, Java, OCaml, Python, SQL
- **Soft skills**: Communication (served in the Navy for 6 months), Leadership, Enthusiasm, Empathy, Reliability
