Third-year computer science and mathematics student at École Polytechnique, with a strong interest in algorithms, problem solving, and AI. Participated in the SWERC 2025 programming competition and ranked 24th in Southwest Europe.

EDUCATION

2024 – 2028	École Polytechnique, Polytechnician Program Master's degree in France's flagship university in science and engineering	Palaiseau, France
	◦ Multidisciplinary curriculum: Computer Science (competitive programming in C++, data analysis in Python), pure and applied Mathematics (differential calculus, martingales), Physics, and humanities. ◦ President of the competitive programming association, organized internal contests with original problems. Member of the network infrastructure association. ◦ Current GPA: 4.2/4.3	
2022 – 2024	Preparatory class for Grandes Écoles 2-year preparation for the Grandes Écoles competitive exams.	Lycée Louis-le-Grand, Paris
	◦ Chose the Mathematics, Physics and Informatics track, entering at 15 after skipping two grades. Admitted to Polytechnique through the X-ENS exam, ranking in the top 15 in France. GPA: 4.0/4.0.	

EXPERIENCE

June 2026 – Sept. 2026	Software Engineer Intern Linagora	Hanoi, Vietnam
	◦ Developing client-side search for Twake Chat, the Matrix-based Flutter/Dart messaging app of Linagora, a major French open source software publisher: rewired the app's search bars into a unified flow and implemented centralized diacritic-insensitive matching, with several pull requests merged upstream. Currently focusing on search performance and new features.	
2026 – Present	Computer Science Oral Examiner Lycée Louis-le-Grand	Paris, France
	◦ Giving hour-long computer science oral examinations to first-year preparatory class (MP2I) students, two hours a week, with personalized feedback to groups of 3 students on topics including data structures and C and OCaml programming. Wrote over 30 original exercises, now being compiled into a booklet.	
Sept. 2024 – Apr. 2025	Cadet Officer, French Navy École Polytechnique's military training internship	Toulon, France
	◦ Served for 6 months, developing leadership, communication and adaptability.	

PUBLICATIONS

- Lbath, M., **Parésy, A.**, Kaddouri, A., Zighem, A., & Vie, J. J. (2026). Live Knowledge Tracing: Real-Time Adaptation using Tabular Foundation Models. arXiv preprint arXiv:2602.06542. Accepted at AIED 2026 (CORE rating A); presented at the onsite poster session. Work conducted as part of a year-long project on knowledge tracing and AI in education, under the guidance of Jill-Jënn Vie (Inria).

INTERESTS AND SKILLS

- **Competitive programming:** Represented Polytechnique at ICPC SWERC 2025, the Southwest Europe regionals of the world's largest programming competition (70,000+ students), ranking 24th with my team. Reached round 3 of Meta Hacker Cup 2025 (top 1%). Prologin 2025 and 2026 finalist (top 100 in France).
- **Problem solving:** Ranked 6/1704 in the 2022 French Mathematical Kangaroo and 10th in my region at the 2021 Olympiades de première, France's largest mathematics olympiad.
- **Sports:** Participating with the Polytechnique badminton team in the university tournament.
- **Languages:** French (fluent), English and Chinese (proficient), German (basic).
- **Programming languages:** C, C++, Dart, GLSL, Java, OCaml, Python, SQL
- **Programming tools:** Git, Docker, Jupyter Notebook, Linux
